NIM : 2802403656
Nama : Fransiskus Xaverius Kevin

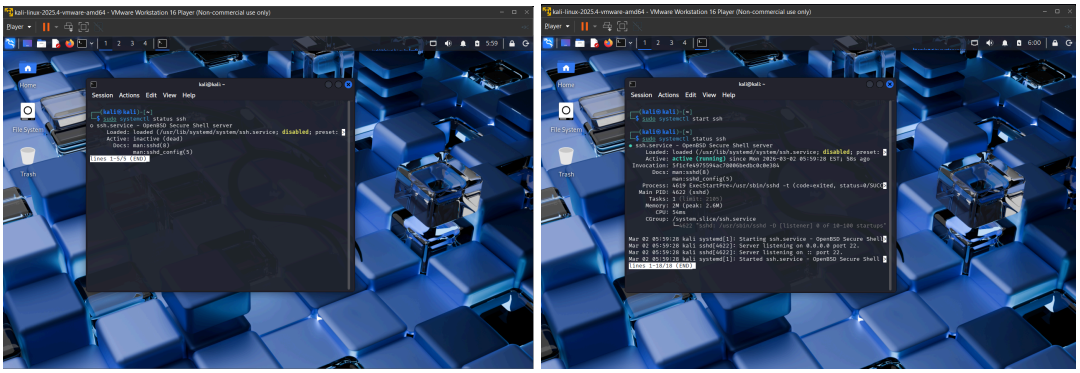

*Software* dan *Operation System* (OS) yang saya gunakan:

- VMware Workstation 16 Player
- Kali Linux 2025.4 (Virtual Machine)

Konfigurasi

1. Mengaktifkan SSH Server

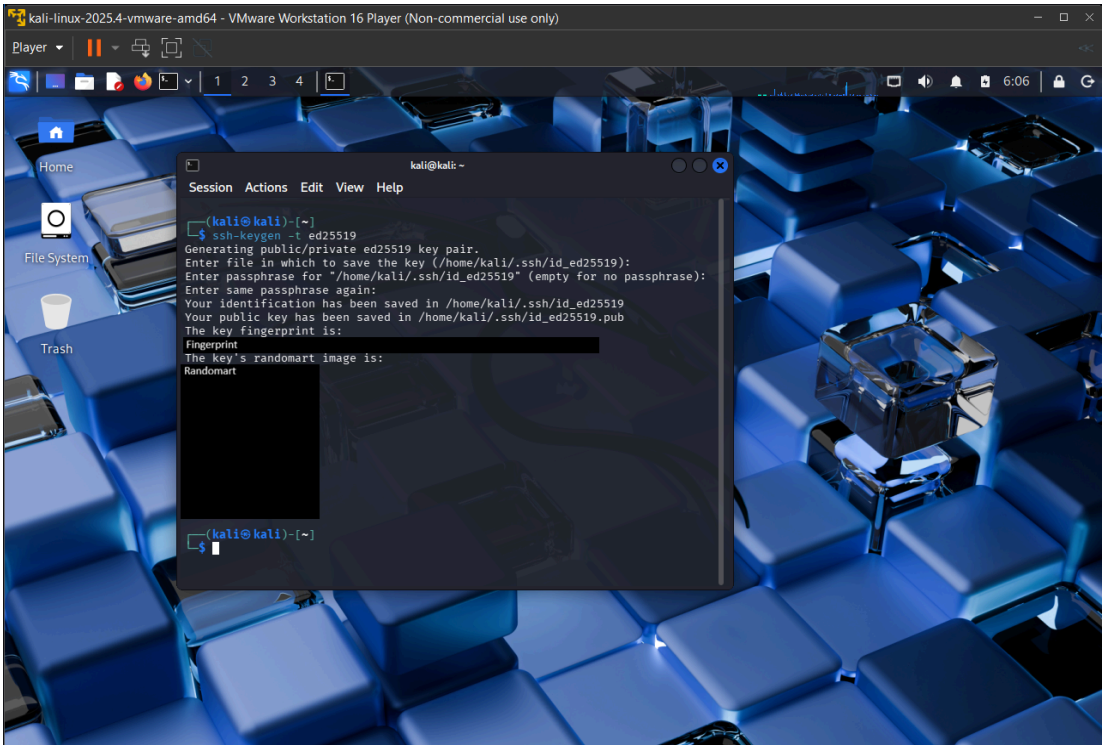

```
sudo systemctl start ssh
sudo systemctl status ssh
```

*Service* berubah dari *inactive* menjadi *active* (*running*) pada *port* 22.

2. Generate SSH *Key Pair*

```
ssh-keygen -t ed25519
```

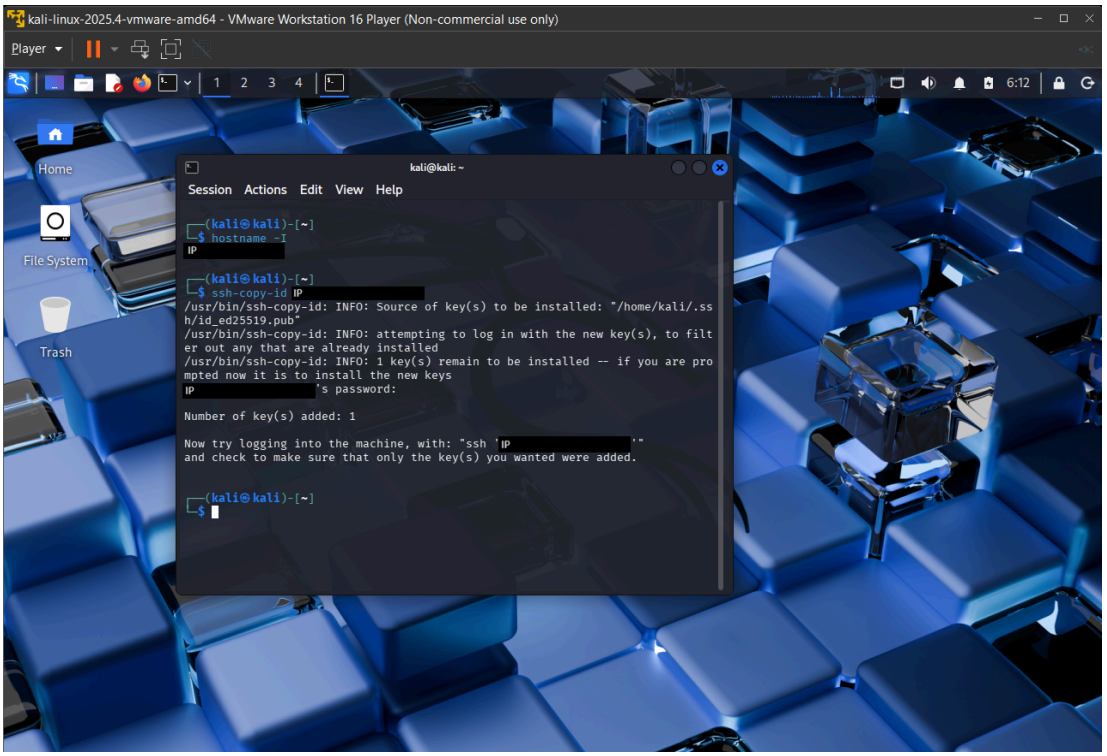

Diproses ini ada 2 file yang dihasilkan:

- id_ed22519 (*Private Key*) : Untuk membuat *signature*
- id_ed22519.pub (*Public Key*) : Untuk memverifikasi *signature*

3. Copy *Public Key* ke Server

```
ssh-copy-id kali@[IP_ADDRESS]
```

Menambahkan *Public Key* ke server

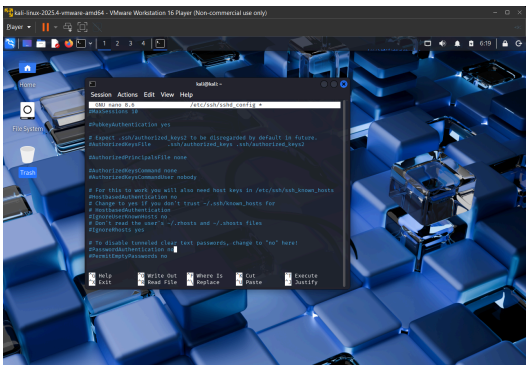

4. Konfigurasi SSH *Key-Only*

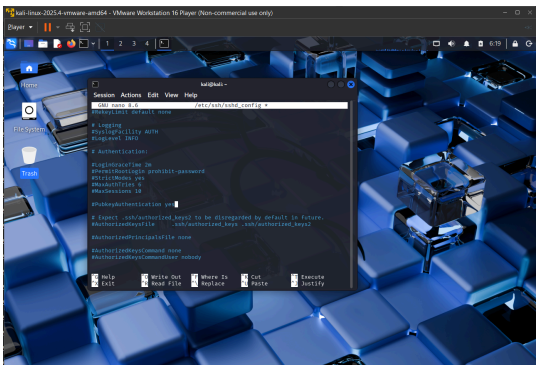

```
/etc/ssh/sshd_config
```

Membuka file *config* untuk mengubah cara *authentication*.

```
PasswordAuthentication no
PubkeyAuthentication yes
```

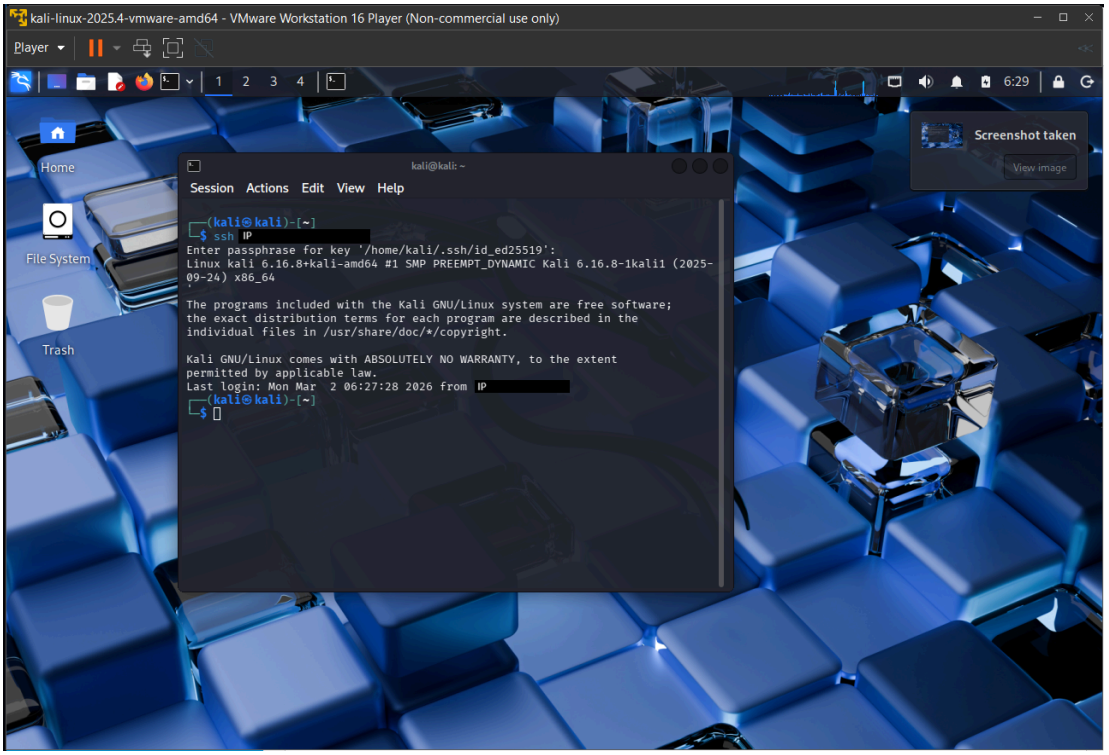

```
sudo systemctl restart ssh
```

*Restart service*

5. Verifikasi Login

```
ssh kali@[IP_ADDRESS]
```

Login berhasil tanpa memasukkan password
